WOHL Sampling Guide

For specific sampling guidelines, please refer to the current Sampling Guide. You can access it from our homepage at www.WOHL-lab.com.
Many other types of analyses are offered which are not listed in this fee schedule. Please call the laboratory for details and prices. Some of these analyses may require a minimum of 3 samples. If fewer than 3 samples are received the client will be billed for 3 samples.

Sampling Media Charges

Sampling media costs are included in the listed price with the following exceptions:

Passive VOC Monitors			
Assay 525 Badge (128)	$15.00		
Assay 566 Badge (128.1)	$13.00	**OVS-2 and OVS-7 Tubes (4, 116)**	$13.00
Air-O-Cell Cassettes (139)	$5.00	**OVS TENAX Tubes (117)**	$19.00
PPI Impactors 2 lpm (175)	$24.00	**DNPH Seppak (138)**	$13.00
PPI Impactors 4 lpm (179)	$24.00	**UMEX 100 Badge (167)**	$13.00

These costs are in addition to any charges for analysis. Tests that have additional media charges are marked with an "*".

Equipment Loans Available

The lab maintains equipment for the use of our clients who test only occasionally. The program is free for our clients; however, not all equipment may be available at any given time. If you sample frequently or need a large amount of equipment, please consider purchasing your own. When ordering equipment, please be prepared to give us the flow rate so that we can calibrate the pump(s).
Outgoing, domestic, non-rush shipping of pumps and samplers is free. Any rush shipping charges will be paid by the client. You should request your equipment to be received close to the day of sampling and use and return it as soon as possible so that others may use it.
The customer pays all shipping charges for Anderson Samplers. Overnight shipment recommended.

Air-O-Cell sampling pump	High Volume (10-20 lpm) pumps	WallChek sampler
Andersen N6 sampler	MSA Dorr-Oliver cyclones	Aluminum cyclones
Field rotometers	Personal sampling pumps & accessories	

Accelerated Service Procedure

WOHL offers accelerated service levels: SAME DAY, RUSH or PRIORITY. Requests for these services must be prearranged before shipment of samples by calling **(800) 446-0403 or (608) 224-6210**. Requests for accelerated service without prearrangement will be handled as accelerated samples, but no guarantees will be made as to length of turnaround time.

Levels of Service/Turnaround Time

NORMAL: The fee is the listed price. Turnaround times (TAT) vary with sample type and quantity. Average turnaround is five to ten working days. Samples are usually analyzed in order of receipt or scheduled for most efficient analysis.

PRIORITY: The fee is 1.5 times normal sample price. Priority analysis must be **prearranged** with the analyst. Usual PRIORITY turnaround time (TAT) is two to three working days.

RUSH: The fee per sample is 2 times the normal sample price. Analysis must be **prearranged** with the analyst. Usual RUSH turnaround time (TAT) is one to two working days.

SAME DAY: This level of service is only available for a limited number of analyses. Primary tests are: spore traps, tape lifts and asbestos. Please call lab to see if same day analysis is available.

Our working days are Monday through Friday excluding holidays.

WOHL strives to provide the fastest turnaround possible for all specimens, but some factors affect the availability of accelerated service, including:

- Number of samples. Large quantities take longer to finish.
- Type of sample. Certain sample types take longer to analyze.
- Number of requests per sample. Samples with multiple analyses will take longer.
- Prearrangement. Phoning ahead can place an accelerated order on your samples.

Sample and Data Retention Policy

Our policy is to retain records for the period of time required by our accreditations and by law. Contact the lab to make arrangements for extended storage or transfer. Retention times for samples are as follows:

Bulk Asbestos	1 year	Total Weight Filters	1 year
Air Asbestos Filters	1 year	Desorbed Air Samples	only until results reported
Other Bulk Samples	1 year	ECOC Filters	1 year

Blank Submission Policy

The Wisconsin Occupational Health Laboratory strongly recommends submitting blank sampling media with all types of samples. Blanks added by the lab only correct for background levels of analyte on the media as a result of the manufacturing process and will not correct for additional contamination during handling by the client or shipping. Therefore, please include your own blank when submitting samples. The charge for blanks will be the same as for regular samples as they are analyzed identically.

Minimum Number of Samples

There is no minimum number of samples required for the most common types of analyses. However, for some difficult analyses, there is a three sample minimum. Those analyses requiring a three sample minimum are marked with a "③". If fewer than 3 samples are received, the client will be billed for 3 samples.

Shipping Charges

WOHL uses UPS as its standard courier. There is no charge for shipping supplies by UPS ground within the United States. Other than outgoing overnight shipments for media that must be kept cold, all next day, second day, and international shipment charges will be billed to the customer. Clients will also be billed for shipping agar plates overnight.

Customer Service

Our customer service team can help you order, plan sampling strategies, and interpret reports. Call us at 800-446-0403 or (608) 224-6210. To get the fastest response to your needs, please inform the office staff of the type of assistance you need. They will put you in touch with the staff member who can best meet your needs. You can also email us at the following addresses:

Lab Director……..WOHLdirector@slh.wisc.edu
Customer Service……..WOHLservice@slh.wisc.edu

Billing Information

Invoices are issued at the beginning of the month following completion of testing and/or other charge such as media or shipping. Full payment is due within 30 days from date of invoice.

Submission Information

A submission form is required with all samples. WOHL submission forms are available on our website at www.wohl-lab.com. Please make sure to send a legible physical form with your samples. Please fill out the billing section with the specific, current company name along with the contact information for the person(s) who should be receiving the results report. We issue our reports in pdf format by email.

Non-Routine Elements & Compounds			
Silver	ICP		38.00
Silver needs to be digested in nitric acid only (our regular digestion is nitric and hydrochloric acids). For this reason if silver is required, a nitric-only digestion will be done. Any other elements may be done with silver, except Sb and Sn (they require the hydrochloric acid).

Solvent Scan on TraceAir II 525 Organic Vapor Monitor

Cost: $205.00 for analysis and $15 for badge

Collection:

The sample is extracted with a 97:3 (v/v) Carbon disulfide:Benzyl Alcohol solution and analyzed by gas chromatography equipped with a flame ionization detector (GC-FID).

AT525 Badge has a faster uptake rate best for IAQ or concentrations <10 PPMs.

GC Pesticides by modified EPA 8081 and OSHA 62, 67, 70

Collection:

These analytes can be collected on an OVS-2 (SKC 226-58). The sample is extracted with Toluene and analyzed by gas chromatography equipped with an electron capture detector (GC-ECD) or flame ionization detector (GC-FID). The recommended flow rate is 1.0 LPM for 60 to 480 minutes (60-480 L). The fee for a Pesticide scan is $400.00/sample plus $13.00 OVS-2 media charge.

Analytes included in Pesticide Scan:

1. Aldrin (CAS#: 309-00-2) – 10 ng
2. alpha-BHC (CAS#: 319-84-6)
3. beta-BHC (CAS#: 319-85-7)
4. delta-BHC (CAS#: 319-86-8)
5. gamma-BHC (Lindane) (CAS#: 58-89-9)
6. cis-Chlordane (CAS#: 5103-71-9)
7. trans-Chlordane (CAS#: 5103-74-2)
8. p,p-DDD (CAS#: 72-54-8) – 10 ng

A variety of metals can be collected on the same filter; however, some need to be collected separately due to solubility differences. Please call the lab if you have questions about which metals can be collected together. Pricing for ICP analysis is as follows: The first metal on a filter is $38. Each additional metal on the same filter is $8. For special metals such as mercury and silver, please see the alphabetical listing. There is an additional $10 prep charge per sample for bulks. Please note that oxide compounds cannot be determined specifically. The metal content is determined and a conversion factor is applied. The ICP determines metal content, which may or may not include all compounds of that metal. If you are interested in metal oxides, you should call the lab to determine the best sampling strategy.
